

Personal statement

I'm an enthusiastic and pro-active Web Developer and who makes easy to use websites and applications by discovering how users really think. With 4 years' experience of developing websites and web applications, I have an excellent understanding of how technology can be used to align the requirements of both the business and the customer. I am seeking a new challenge in a progressive and customer-centric organization where I can make the most of my love of technology and my knowledge of user-centered design techniques. My passion for learning - and my involvement in the Web Development - means that I can continually offer the latest technology, practices and ideas to the team, ensuring the company is at the very forefront of customer experiences.

Working in a fast paced environment and producing a high volume of websites. Responsible for developing websites that give users a seamless and rich Internet experience, and for being the first point of contact for end users if they have any queries or technical problems.

Duties:

- optimizing web assets for optimal speed and performance.
- Researching new technologies, software packages and hardware products .
- Advising customers and clients on the limitations of systems and website functionality.
- Make suggestions for improvements in technology, content and user interaction.
- Testing a website before it goes live to identify any problems.
- Designing and deciding on the visual layout of a website.
- Changing the code, software or graphics of existing websites.
- Creating eye-catching and functional digital design concepts across various platforms.
